

We live in a small town 120 miles north of Dallas TX and without satellite radio we cannot pick up any information about conditions in Dallas. We also like smooth jazz and without satellite radio we don't have any chance to hear what we enjoy. It seems as though this is all about competition and loss of revenue to a select few that would like to keep status quo. I believe capitalism works best with competition. FCC needs to act responsibly and reject the NAB's petition 04-160 to stop fee paying people from having what they want to purchase for their enjoyment. My suggestion to NAB and its member companies would be to do what I do in my business and that is to "get competitive! No gimme's here gotta become a better option then satallite and you will get your volume and profits back. That is just the way is works in the USA.
